

Agile, Scalable and Affordable Sohema Technical Reference

The Sohema Framework

Sohema is a Framework that provides the layers needed to give clients the agile, scalable and affordable case management solutions they need. Organizations using Sohema can rest assured that the Framework provides a consistent, secure environment for their users to work in.

Leveraging industry standard Microsoft tools, the Sohema Framework provides organizations with a case management solution that provides consistent performance and flexibility for organizations of all sizes. The Microsoft tools ensure the highest level of support for the base technologies that Sohema relies on, along with the guarantees from Microsoft for agile, scalable and affordable software tools.

The Framework

- Reference Templates
- Sohema Composer
- Sohema Core Modules
- Sohema Engines
- Sohema Foundation
- Sohema Platform Adaptors

The Technology

- Windows Server 2008 R2
- SQL Server 2008 R2
- SQL Server Reporting Services
- Windows Workflow Foundation
- .NET 3.5

Secure and Private

The security and privacy of your client's data is a priority that we understand. The Sohema Framework secures data by using data, service location, workgroup and privilege based security for users. This allows for flexibility in how you share information on clients and cases.

All user access to Sohema, whether within your office network or over the internet, is secured by using industry standard SSL 256 bit encryption certificates.

Sohema Hosted for You

Let TP Systems manage the technology required to run your case management. Many agencies find that they need to focus on their core business of serving clients. Sohema hosted for you provides you with the peace of mind that the technology, data and security of your critical case management system is always available when you need it.

We look after the computer hardware, networks, data backups and security. All you need to worry about is the workstations and network access for your workers.

Sohema - Agency Hosted

If you already manage your own technology and prefer to manage the technology, Sohema can be hosted within your technology environment. Sohema requires one web server and one SQL Server database server. We will provide the documentation and any support needed for the installation to ensure you are up and running in the shortest timeframe.

Web Browser Compatibility

Sohema is a web based solution meaning that you can access your case management information from wherever your workers are located. Sohema has been tested and is compatible with all standard internet browsers on the market including Internet Explorer, Safari, Chrome, and Firefox.

Workstation Specifications

The minimum configuration we recommend for workstations:

- Microsoft Internet Explorer 7 or 8
- Microsoft Office 2007 or 2010
- Windows XP or greater
- 2 GHz CPU, 1 GB RAM, 40 GB Hard Drive
- High-Speed Internet Connection (LAN / Cable / DSL)
